

# HIGHWAY 41/10 PROJECT

## HIGHWAY 41/10 INTERSECTION IMPROVEMENTS

The project team used the findings from the Highway 10 Corridor Study as a baseline for assessing possible safety and travel improvements at the Highway 41/10 intersection. Following further technical evaluations, the project team is recommending to reconstruct this intersection into a multilane roundabout.

## MULTILANE ROUNDABOUT BENEFITS

- » Reduced severity of crashes
- » Improved traffic flow
- » Fewer lanes without affecting capacity
- » Designated travel lanes
- » Limited weaving movements
- » Reduced vehicle speed
- » Fewer construction impacts
- » Fewer overall property impacts
- » Improved White Oak Drive access
- » Reduced wait times
